Installation

Please follow the below steps to complete the installation process.

- After purchasing Ekattor, you will get the application as a zip file. Upload that zip file on your server.
- You can upload anywhere inside your **public_html** folder or any sub-folder you want. Just keep in mind the directory name where you have uploaded it.
- Unzip the file.
- Go to your preferred web browser and type the url where you have unzipped the file. For example - if you have a domain example.com and you have unzipped the files inside a folder ekattor, the url will be **example.com/ekattor**.
- After you have entered the url on your browser will see the screen below.

- This is the first step of the installation. Before starting the installation process, you will need to have CodeCanyon purchase code, the database name, database username, database password and database host. You can get the purchase code from your purchase information on codecanyon, for having the database information, you will need to create a new database on your server.

- After you hit the ‘Start Installation Process’ button you will see the screen below.

The screenshot shows the Ekattor Installation page. At the top, there is a dark blue header with the Ekattor logo and the word "Installation". Below the header, a white box contains the following text:

We ran diagnosis on your server. Review the items that have a red mark on it. If everything is green, you are good to go to the next step.

- ✓ application/config/database.php : file has write permission
- ✓ application/config/routes.php : file has write permission
- ✓ Curl Enabled

To continue the installation process, all the above requirements are needed to be checked

Continue

Need help? [Contact support](#)

- This screen checks if the required files have the write permission and curl is enabled or not. If these are not enabled, you will face issues in the installation process. So make sure that all the three points on that screen have a green check mark. If everything is fine and you hit the ‘Go To Next Step’ button will be presented with this screen

The screenshot shows the Ekattor Installation page. At the top, there is a dark blue header with the Ekattor logo and the word "Installation". Below the header, a white box contains the following text:

Provide your codecanyon purchase code

Purchase Code

Product's Purchase Code

Continue

Where to get my purchase code ?

Need help? [Contact support](#)

- Here you will need to insert your purchase code that you have got from CodeCanyon and hit the 'Continue' button which will lead you to the screen below.

The screenshot shows the 'ekattor Installation' screen. At the top, there is a dark blue header with the 'ekattor' logo and the word 'Installation'. Below the header, a light blue box contains the following text: 'Below you should enter your database connection details. If you're not sure about these, contact your host.' The form has four sections, each with a label, an input field, and a hint: 1. 'Database Name' with a hint 'The name of the database you want to use with this application'. 2. 'Username' with a hint 'Your database Username'. 3. 'Password' with a hint 'Your database Password'. 4. 'Database Host' with a hint 'If 'localhost' does not work, you can get the hostname from web host'. At the bottom of the form is a blue 'Continue' button. Below the form, there is a link: 'Need help? [Contact support](#)'.

- Here you will need to insert your previously created database credentials correctly. The installer will check if the information are correct after you hit the 'Continue' button and if everything is fine, you will be directed to the page below.

Your database is successfully connected. All you need to do now is hit the 'Install' button. The auto installer will run a sql file, will do all the tiresome works and set up your application automatically.

Install

Need help? [Contact support](#)

- Now all you have to do is hit the 'Install' button which will automatically import the database of the application to your created database. Please wait while the import operation is being done. This may take a while according to your server performance.
- After the installer has successfully imported the database, you will get the following page.

Congratulations!! The installation was successful

Before you start using your application, make it yours. Set your application name and title, admin login email and password. Remember the login credentials which you will need later on for signing into your account. After this step, you will be redirected to application's login page.

School Name

Ex: Central Park High School
The name of your School

Academic Session

Ex: 2020
Current Academic Session Example: 2019

System Name

Ex: Ekattor School Manager
The name of your application

Superadmin Name

Ex: John Doe
Full name of Administrator

Superadmin Email

Ex: john@example.com
Email address for administrator login

Password

Superadmin login password

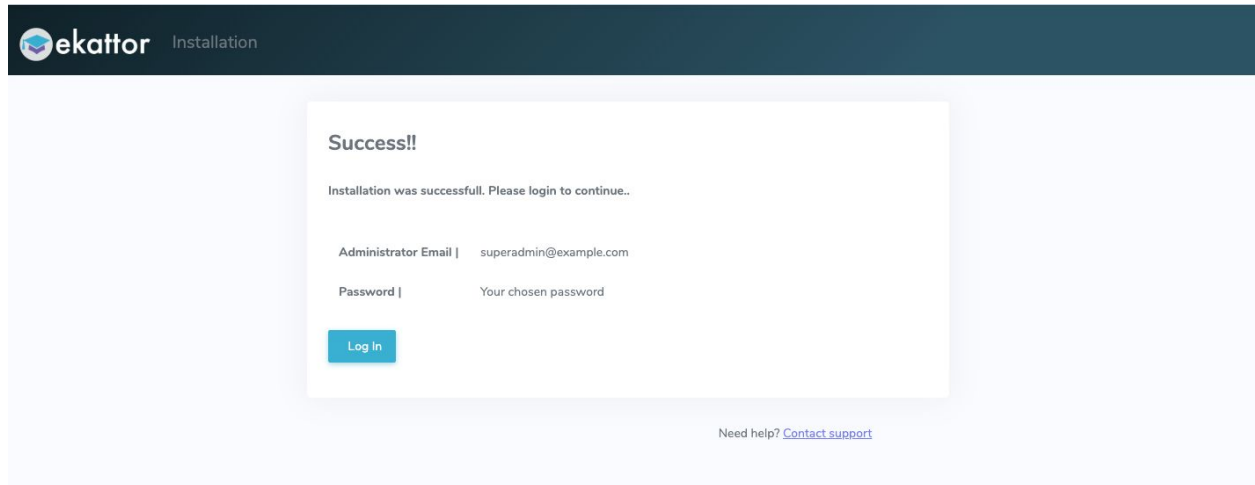

TimeZone

Asia/Dhaka
Choose System TimeZone

Set me up

Need help? [Contact support](#)

- Fill up the information required and hit the button ‘Set me up’. This will save your school name and administrator login credentials which will be required later for logging in into the application and will present the following page.

- Now hit the ‘Log In’ button which will redirect you to the backend of the application where you will be able to login as Super administrator using the email and password you have entered in the previous step.
- Please make sure to go through all the steps chronologically. Otherwise the installation might fail and you will face issues running the application. For any help, contact [Creativeitem Support Center](#)

Product Update Instructions

- If you are already running the application, please go through the file update_instructions.txt which can be found within the downloaded copy of the product in ‘updater’ folder. All the necessary information required to successfully update the product will be there.
